

JUSTIN TROY L. ROSALADA

jtrosalada@gmail.com | +63 9953697075 | Davao City, Philippines

CAREER OBJECTIVE

A third-year Computer Science student seeking an OJT opportunity to apply my academic knowledge in cybersecurity, software development, and intelligent systems in a real-world setting. Eager to contribute to a forward-thinking technology team, gain hands-on industry experience, and grow as both a developer and a security professional.

EDUCATION

Bachelor of Science in Computer Science

2023 – Present

University of Mindanao, Davao City, Philippines Currently in 3rd year

Specialization in Software Development, Cybersecurity, and Intelligent Systems. Ongoing thesis on AI-driven disaster-related fake news detection for Philippine social media.

WORK EXPERIENCE

Customer Service Representative

Jan 2026 – Apr 2026

Alorica Inc., Davao City, Philippines

- Provided technical and customer support in a fast-paced BPO environment.
- Developed strong communication, problem-solving, and multitasking skills under high-volume conditions.

TECHNICAL SKILLS

Core Competencies: Threat Analysis, Network Security Fundamentals, Code Quality Assurance & Testing, AI-Driven Systems

Languages: Python, Java, JavaScript, SQL, PHP, HTML, CSS

Libraries & Frameworks: Django, Laravel, Bootstrap, Streamlit

Tools: Git/GitHub, Visual Studio Code, AI Tools & Prompt Engineering

CERTIFICATIONS

IT Specialist – Cybersecurity | Certiport

May 2026

IT Specialist – Network Security | Certiport

Mar 2026

IT Specialist – Databases | Certiport

May 2025

RESEARCH

Enhanced Disaster-Related Fake News Detection in Philippine Social Media Using AI

Ongoing Thesis

Ongoing thesis focused on detecting disaster-related misinformation in Philippine social media using AI-based text and image analysis. Addresses the challenges of multilingual and multimodal misinformation in disaster-context social media posts.

PROJECTS

Enhanced DistilBERT with OCR-Based Text Extraction for Fake News Detection in Philippine Social Media Mar 2026 -May 2026

Proposes a multimodal fake news detection framework integrating DistilBERT with Tesseract OCR to extract and classify text embedded in social media images such as screenshots, edited posts, and memes. Uses the Philippine Fake News Corpus as the primary dataset, merging OCR-extracted image text with original textual content for contextual classification using DistilBERT. Evaluated using Accuracy, Precision, Recall, and F1-score.

Abs Track Fitness Gym Management System Aug 2025 – Mar 2026

Built a large-scale client web application with five integrated subsystems using the Laravel framework and Laragon. Covers membership management, scheduling, billing, and data-driven gym operations.

Vitapets Animal Clinic Management System

Mar 2025 – May 2025

Developed a full-stack veterinary clinic system handling client records, appointments, and data-driven clinic workflows.

Instant Noodle Cooking Station Simulation (Arena DES)

Mar 2026 – May 2026

Simulated a Korean-style self-service restaurant cooking station using Arena discrete-event simulation. Analyzed customer wait time, station utilization, and throughput across 2 vs. 4 station scenarios using FCFS queueing and exponential arrival distributions.

El Pedidos Mexicanos – Desktop Food Ordering System

Oct 2024 – Dec 2024

Built a desktop-based food ordering system using JavaFX and MySQL focused on efficient order management for a restaurant-style workflow.

Anga University – Student Management System

Oct 2024 – Dec 2024

Developed a student management and course merging system in Java using JavaFX and linked lists. Supports adding, deleting, sorting, importing, and merging of student and course records. Proposed implementation achieves $O(m + n)$ time complexity for merged list operations.

Modeng Zoo Management System

Oct 2024 – Dec 2024

Designed a database-driven zoo management system covering animals, enclosures, employees, care programs, events, ticketing, and visitor management. Implemented using ERD-based relational design with primary keys, foreign keys, and many-to-many relationship constraints.

ORGANIZATIONS & AFFILIATIONS

UM Student Developer Community | Member

Aug 2025 – May 2026

Active member of the University of Mindanao's student organization focused on software development, tech projects, and developer community building.

Junior Blockchain Education Consortium of the Philippines – UM Davao | Member

Aug 2024 – May 2025

Member of the UM chapter of JBECF, a student-led organization promoting blockchain education and Web3 awareness among Filipino university students.

DurianPy – Davao Python User Group | Volunteer

Aug 2025 – Dec 2025

Contributed as a volunteer for DurianPy, a community-led non-profit dedicated to growing the Python programming community in Davao City through meetups, workshops, and open-source advocacy.

SEMINARS & EVENTS

Build with AI Davao 2025 – GDG Davao

May 2025

Participated in a community-led Google Developer Group event featuring workshops and hands-on sessions on Generative AI, AI Studio, and Gemini models.

DevFest Davao 2025 – GDG Davao

Nov 2025

Attended a local tech conference themed "Building Safe, Secure, and Scalable Solutions with AI and Cloud," covering Vertex AI, Gemini API in Web, and hands-on workshops in AI App Prototyping, Cloud-Native Development, and Rapid App Building.

Blockchain Campus Conference 2024 – Logistics Volunteer

Oct 2024

Assisted in logistics and event setup for the 2-day Blockchain Campus Conference 2024 held at Mapua Malayan Colleges Mindanao, Davao City, which gathered over 1,500 students, professionals, and blockchain advocates across Mindanao.
